

## IN-LINE PATCH TELEPHONE HYBRID

The Inline Patch is a unique hybrid that connects between the base of an analog or cordless telephone and the wall jack. The Inline Patch contains two back-to-back hybrids for complete control of audio from both sides of the call while you talk. Audio input jacks let you mix sound bytes or music into your conversation. One stereo output jack provides your voice on one channel and the caller's voice on the other channel. A second output jack contains a mix of both voices. Front panel control for each output offers all the control you need. The Inline Patch will not disrupt your Caller ID or ring signals.

- XLR input and output jacks • Mini stereo output jack, caller on left channel, local voice on right channel • Mini output jack, caller and local voice combined on both channels • Mini input jack sends signal to phone line • Mini jack for remote on-hook / off-hook • Front panel Separation control fine tunes voice separation • 20 dB nominal separation of phone line transmit / receive audio

## JK AUDIO BLUEPACK CELL PHONE INTERFACE

BluePack allows live man-on-the-street interviews through a cell phone equipped with Bluetooth Wireless Technology. This sleek belt pack provides a professional look and feel to field reporters and remote talent. A 3.5 mm stereo line input jack allows recordings to be mixed into the broadcast. The 3.5 mm stereo line output jack provides your full bandwidth microphone signal on the left channel and Bluetooth audio on the right channel. The stereo headphone output gives you a mix of the XLR microphone input, 3.5 mm input, and Bluetooth audio. This powerful 1/2 watt stereo headphone amplifier will cut through any crowd noise. BluePack also pairs to Bluetooth equipped sound cards and music players in full bandwidth stereo A2DP mode. It is not available, it will connect to any other product, such as a notebook or portable that allows a Bluetooth wireless connection. This wireless headphone mode offers a full audio bandwidth stereo connection.

JK-BLUEPACK • Reg. \$495.00 Discount Price \$449.00

## JK AUDIO REMOTE AMP TWO BELTPACK

Remote Amp Two provides a listen only connection for mono IFB or full bandwidth stereo music listening. Separate volume controls for the XLR and 3.5 mm line input jacks allow a simple mix of mono and stereo sources. The XLR line level input accepts either a balanced mono signal, or a party line intercom feed (listen-only). The 1/2 watt, 1/4" stereo headphone jack will cut through any crowd noise. Connect an IFB earpiece to the 3.5 mm earpiece jack for mono operation.

JK-REMOTEAMP2 • Reg. \$245.00 Discount Price \$219.99

## REMOTE MIX SPORT

• A combined phone line hybrid mixer and universal handset interface featuring an audio mixer, headphone amplifier, telephone hybrid and PBX telephone interface in one • Perfect for remote broadcasts, sport events, and field reporting • Three microphone inputs and three headphone outputs • Use RemoteMix Sport as a front end mixer for your ISDN or POTS codec • The 1/4" cue input on RemoteMix Sport bypasses the output and feeds only the headphone jacks • Connect to a phone line to receive IFB feeds, switch the balanced XLR output to a clean Mix mix and connect to your camera input for monitoring • On board PBX jack with three position switch for type select • RemoteMix Sport can emulate electret, dynamic and carbon handset microphone types. This will allow you to use your professional microphones and headphones during the broadcast • New 2.5mm Wireless Interface for wireless phones that accept third party headsets (adapter cable included)

REMOTEMIX SPORT • Reg. \$995.00 Discount Price \$919.00

## PUREFORMER ISOLATION TRANSFORMER

The Pureformer provides hum and noise reduction for sound cards and audio equipment, and removes ground loops and DC paths that can cause hum and signal breakup. The Pureformer isolates the electrical grounds of two pieces of audio equipment. This is especially important in the case of computer audio cards connected to high quality/low noise audio equipment. The computer electrical ground is often filled with noise from disk drive activity and data transmission. Many audio cards use the same electrical ground for the computer and the audio signal. When the computer audio card is connected to your studio equipment, the electrical noise from the computer can leak into the rest of your audio system. The Pureformer completely isolates the electrical ground of the two systems and only allows audio signals to pass through. Pureformer cannot remove noise once it has been mixed with the audio signal, so it is important to find and treat the source of each problem.

## JK AUDIO GUEST MODULE 1

Guest Module 1 gives you remote access to the on-hook / off-hook and dial features of either the Broadcast Host or Innkeeper series digital hybrids. Connect Guest Module 1 using an 8 pin RJ45 modular cable. This cable provides remote power so there is no need for batteries or an external power pack. The Call button will flicker when a call comes in. Press this button to answer or place a call. The button will stay lit when a call is present. When you dial on-air, the tones go out on the line, and do not come back mixed with the dial tone or caller signal. Guest Module 1 was designed exclusively for JK Audio Broadcast Host or Innkeeper 1x/1rx digital hybrids.

GUEST MODULE 1 • Discount Price \$139.00
